

Smart, secure workplace modernization.

Critical Ops develops, tests, and validates business processes at the intersection of technology and human engagement.

IMPLEMENT

Technology use in the workplace has accelerated since 2020. Our governance audits and process flow analyses identify bottlenecks, overlaps, and allow for innovation.

SECURE

Secure systems are the key to protecting customers, partners, and data. Go beyond minimum compliance requirements. Surpass your competition with a cybersecurity maturity assessment or cloud migration plan.

SUSTAIN

For businesses to compete in a complex world, they must be agile and lean. Keenly invest resources and maximize your talent using data-driven modernization.

“It was a small time commitment given how much there is to do in the world with risk and compliance.”

*-Jenaye Simon
Associate Vice President and
Manager of Operational Risk,
Greylock Federal Credit Union*

ABOUT US

Overcoming resistance to workplace modernization is both an art and a science. It requires a careful balance of people and technology. Since our start in 2012, clients have relied on our expertise to become more efficient and streamline their processes. Organizations have used our services to securely implement technology, upskill their workforce, and continuously monitor emerging threats. **We want to be your partner in a people-driven, technology-supported future.**

OUR SERVICES

- Cybersecurity Maturity Assessment
- Cloud Migration Plan
- Process Flow Analysis
